Objective

Detail-oriented React Developer with 1+ year of experience building dynamic, responsive web applications. Passionate about crafting clean, reusable components and optimizing performance.

Seeking to leverage my skills in React, TypeScript, and modern frontend ecosystems to contribute to innovative projects.

Experience

Frontend Projects:

Fast React Pizza Company:

- Mainly uses React, Redux and Tailwindcss.
- The main goal is to show Pizzas and the ability to order them.
- Colorful and well-designed UI.

The Wild Oasis Website:

- Mainly uses Next.js, Tailwindcss, Supabase, Date-fns and framer-motion.
- The main goal is to manage booking the hotel Cabins.

Rest Countries Web:

- Mainly uses React, Tailwindcss and framer-motion.
- The main goal is to show all Countries of the world
- Perfect animations with awesome dark theme.

Ghaith Chat App:

- Mainly uses Next.js, Tailwindcss, Supabase and the Context-Api.
- The purpose of this **Project** is to Chat and Interact with family and friends.
- It depends on emails to add anyone to the friends list.
- Still needs some fixes I am working on it hard.

Backend Project:

Shamify (Delivery App):

- Mainly uses Laravel v10.0 and MySQL.

- The main goal is to show, update, delete and order Products.

- Very strong auth with **Laravel Sanctum.**

- Notifications Feature using Firebase notifications service.

And a lot of small Projects that you can find on my GitHub Account
